

May Newsletter 2010 – “Spruce up for Summer”

Paramount invites you to spruce up your lawn and outdoor living space with some of our exciting services:

Landscaping Lighting - Our LED lights use 1/3 of the normal electric and provide a cleaner whiter light. LED lights also have a 15-year warranty on the bulbs and the fixtures! We can design and install a lighting package to enhance your home and landscape at night. Lighting also provides security, safety and beauty at night for you, your family, and friends.

Sprinkler Start Ups – Often customers wait until the last minute to call to start up their sprinklers, such as the first hot dry day in June. Obviously we can't get to everyone on the first hot dry day, so please call now if your system has not already been started up and serviced.

Sprinkler Systems - The Weathermatic water management system has become extremely popular. Check out the testimonials on www.paramountlandscaping.com. This system waters your lawn based on what it needs rather than the "old fashioned" timer, saving you time, money, and water. The Weathermatic water management controller also provides your lawn and plants with the proper amount of water which is far superior to a timer box. Purchasing this controller is a wise environment friendly decision.

Putting Greens - Hottest item on the market! Coming soon - A demo putting green at our office! Check our website for more information and updates to find out when you can stop in to view the finished product and try it out!

Water Features - We have been installing and maintaining water features for many years. Our installation process and workmanship is second to none. From one, two, or three waterfalls, to plants, fish, and lighting, we can make it happen. We can also install pond-less waterfalls, fountains, and bubbling boulders.

Full Maintenance - Our full-maintenance clients receive all services necessary to maintain their property, and many clients have enhanced their landscaping with additional services. Our full-maintenance crews are trained to make your property "shine". A full-maintenance program includes mowing, pruning, weeding, mulching, and a fertilization program plus any additional services chosen: Ornamental Tree and Shrub Care, Injection Root Feeding, Aeration, Leaf Removal, Sprinkler Start Up and Shut Down, Floral Installation, and many more. All of these services are bundled together and performed for one low monthly price.

Landscape Design and Installation will improve the value of your property. We can design and install plants, pavers, retaining walls, lighting, sprinklers, water features, sod, seed, and several other services better than anyone in the tri-state! When it comes to new installation, renovating, and upgrading, no one can turnkey a project like Paramount!

Fertilization Department - As most of our clients already know, Paramount's fertilization department is extremely knowledgeable on turf and ornamentals. Our licensed, experienced and knowledgeable team can diagnose problems, make suggestions, and recommend solutions. The owner, office staff, managers, and technicians are licensed through the Ohio Department of Agriculture.

Please call with any questions, comments, or suggestions. We appreciate your business!

Have a great day!

Thank You.
